Index to Subjects—Volume 25, 1992

Current Microbiology

© Springer-Verlag New York Inc. 1992

Acriflavine reaction, correlation with virulence of *Francisella tularensis* in mice, 95
Alginate production, by fluorescent pseudomonads, effect of osmolarity and dehydration on, 335
Aminopeptidase, from *Streptococcus mitis* ATCC 903, purification and characterization of, 261
Ammonia, cyanobacterial photoproduction of, 83
Anabaena doliolum
  biochemical characterization of glutamine synthetase from, 69
  characterization of chlorate-resistant mutants of, 353
Anaerobic digester, sulfate-reducing bacterium *Desulfovibrio* sp. B strain isolated from, 235
Anaerobic fungi
  effect of glycerol on growth, adhesion, and cellulolytic activity of, 197
  rumen, degradation and fermentation of cellulose by, 143
Anoxygenic degradation, of aromatic substances by *Rhodopseudomonas palustris*, 63
Antimicrobial activity, of siderophore from *Azospirillum lipoferum* M, 347
Aphid endosymbionts
  compared with those of whiteflies and mealybugs, 119
  sequence analysis of DNA fragments of, 283
Aquaspirillum arcticum, synthesis of cold shock and cold acclimation proteins in, 275
Aromatic substances, anoxygenic degradation of, by *Rhodopseudomonas palustris*, 63
Azospirillum lipoferum M, isolation and characterization of siderophore from, 347

Bacillus brevis, compared with its gramicidin S-negative mutant during germination, 341
Bacillus psychrophilus, transformation of, with plasmid pC194, 331
*Bacillus subtilis bgl*S gene, molecular cloning and expression of, 279
Bacillus thuringiensis subsp. *kurstaki*, binding of protoxin and toxin proteins of to clay minerals, 225
Bifidobacterium animalis, phase variations in, 51
Biofilm
  formation of plastics exposed to aquatic environments, 1
  on shiphull, isolation of marine methanogenic bacterium from, 157
Biosynthesis reaction, of glutamine synthetase from *Anabaena doliolum*, 69
Bradyrhizobium japonicum, absence of flavin accumulation in, 269
Butyrivibrio fibrisolvens
  fermentation of xylan by, 189
  induction of xylan-degrading enzymes in, 297

Caecomyces communis FG10, degradation and fermentation of cellulose by, 143
Cellulolytic bacteria
  degradation and fermentation of cellulose by rumen anaerobic fungi and, 143
  effect of glycerol on growth, adhesion, and cellulolytic activity of, 197
Cellulose, degradation and fermentation of, 143
Chloramphenicol
  Bacillus psychrophilus transformant resistant to, 331
  Lactobacillus plantarum strain caTC2 plasmids resistant to, 219
Chlorate-resistant mutants, of *Anabaena doliolum*, characterization of, 353
Clay minerals, binding of protoxin and toxin proteins of *B. thuringiensis* subsp. *kurstaki* to, 225
Clostridium, mesophilic, cellulolytic, adhesive properties of, 307
Clostridium cellulolyticum, adhesive properties of, 307
Clostridium cellulolyticum cellulase genes, compared with mesophilic cellolytic clostridia, 105
Clostridium perfringens type A
  enterotoxin and spore coat protein synthesis by, 35
  netropsin and distamycin stimulates sporulation of, 183
Cold acclimation proteins, *Aquaspirillum arcticum* synthesis of, 275
Cold shock proteins, *Aquaspirillum arcticum* synthesis of, 275
Computer scanning laser densitometry, synthesis of cold shock and cold acclimation proteins studied by, 275
Contact lenses, hemagglutination and hydrophobicity in adherence of *Serratia marcescens* to, 113
Cu(II), change of speciation of, during *P. testosteroni* growth, 57
Culture methods, compared with immunofluorescence assay for detection of *Legionella pneumophila*, 19
Cutinase production, by *Streptomyces* spp., 165
Cyanobacteria, photoproduction of nonhydrogenous resources by, 83
Cytotoxicity assays, isolation and differentiation of peptide toxins produced by *Microcystis aeruginosa* by, 129

Desulfovibrio sp. B. strain, TNT as nitrogen source for, 235
Dihydroxyacetone production, by *Gluconobacter oxydans*, inhibitory effect on glycerol on, 149
Distamycin, stimulation of sporulation of *Clostridium perfringens* type A by, 183

Electroporation, of *E. coli* cloning vectors in *P. stutzeri*, 25
Endosymbionts, of whiteflies, aphids, and mealybugs compared, 119
Enterotoxin synthesis, by *Clostridium perfringens* type A, 35
Escherichia coli
  β-operon, cloning and sequencing of aphid endosymbiont DNA fragment analogous to, 283
  cloning and expression of *phoA* gene from *Zymomonas mobilis* in, 291
  cloning vectors, electroporation and maintenance of, 25
  enterohemorrhagic, exopolysaccharide production by, 9
  regulatory elements affecting *sodA* gene expression of, 135
  Zymomonas mobilis alkaline phosphatase activity in, 41
Escherichia coli O157:H7, antigenic relationship between *Salmonella* O30 group and, 215
Ethanol
  effect on alginate production by fluorescent pseudomonads, 335
  effect on *Zymomonas mobilis* alkaline phosphatase activity, 41
Exopolysaccharide, enterohemorrhagic *E. coli* production of, 9

Fibrobacter succinogenes S85
  degradation and fermentation of cellulose with rumen anaerobic fungi, 143
  effect of glycerol on growth, adhesion, and cellulolytic activity of, 197

Fibroblasts, role in modulating bacterial growth in macrophages, 203
Fibronectin-binding protein, of group A streptococci, 245
Flavin accumulation, in symbiosome space of soybean nodules, 269
Fluorescent pseudomonads, effect of osmolarity and dehydration on alginate production by, 335
Francisella tularensis virulence, correlation with acriflavine reaction in mice, 95

Gluconobacter oxydans, inhibitory effect of glycerol on dihydroxyacetone production by and growth of, 149
Glucosylglycerol, cyanobacterial photoproduction of, 83
Glutamine synthetase, from *Anabaena doliolum*, biochemical characterization of, 69
Glycerol
  effect on growth, adhesion, and cellulolytic activity of cellulolytic bacteria and anaerobic fungi, 197
  inhibitory effect on growth and dihydroxyacetone production by *Gluconobacter oxydans*, 149
Gramicidin S-negative mutant, of *Bacillus brevis*, coexistence during germination, 341
Group A streptococci, fibronectin-binding protein of, 245

Hemagglutination, role in adherence of *Serratia marcescens* to urinary tract epithelium and contact lenses, 113
High-performance liquid chromatography, separation and quantification of cutin monomers by, 165
Hot water devices, detection of *Legionella pneumophila* in, 19
Hydrophobicity
  of ruminant mastitis *Staphylococcus aureus*, 173
  role in adherence of *Serratia marcescens* to urinary tract epithelium and contact lenses, 113

Immunoblotting, electrophoresis of *Vibrio vulnificus* strains with, 99
Immunofluorescence assay, compared with culture methods for detection of *Legionella pneumophila*, 19
Ionophores, effect on proton flux in ruminal bacterium, 327

Lactobacillus plantarum, pyruvate transport by proton symport in, 47
Lactobacillus plantarum strain caTC2, plasmid instability in, 219
Lasalocid, effect on proton flux in ruminal bacterium, 327
Laser radiation, chemical sensitization of oral bacteria to killing by, 77
Legionella pneumophila, in domestic hot water devices, comparison of detection methods, 19
Lipase, from *Pseudomonas cepacia* 90ee, effect on rat lungs, 89
Lipopolysaccharides, from *Vibrio vulnificus* biotypes 1 and 2, electrophoresis of, 99
Lysine catabolism, in *Streptomyces ambofaciens*, effect on spiramycin production, 313

Macrophages, bone marrow-derived, mycobacterial growth in, 203
Maruca testulalis, development of pathogen *Nosema marucae* in, 319
Mealybug endosymbionts, compared with those of whiteflies and aphids, 119
Mesophilic cellulolytic clostridia, growth characterization compared with *Clostridium cellulolyticum* cellulase genes, 105
Metal ions, effect on *Zymomonas mobilis* alkaline phosphatase activity, 41
Methanogenic bacterium, isolation from biofilm from shiphull, 157
Microcystin-LR, differentiation from cytotoxic substance produced by *M. aeruginosa*, 129
Microcystis aeruginosa strain PCC 7806, detection of cytotoxic substance produced by, 129
Microcystis firma, photoproduction of nonhydrogenous resources by, 83
Mn-superoxide dismutase gene, *trans*-acting regulatory elements affecting expression of, 135
Monensin, effect on proton flux in ruminal bacterium, 327
Mycobacterium avium, growth in fibroblasts and bone marrow-derived macrophages, 203
Mycobacterium tuberculosis strains, growth in fibroblasts and bone marrow-derived macrophages, 203

Nalidixic acid, role in isolation of thermotolerant strains of *Salmonella typhimurium*, 257
Neocallinastix frontalis MCH3
  degradation and fermentation of cellulose by, 143
  effect of glycerol on growth, adhesion, and cellulolytic activity of, 197
Netropsin, stimulation of sporulation of *Clostridium perfringens* type A by, 183
Nosema marucae, development in host *Maruca testulalis*, 319

pBR-based cloning vectors, electroporation and maintenance in *P. stutzeri*, 25
Penicillin-binding proteins, role in switching systems of *Bifidobacterium animalis* from different colonies, 51
phoA gene, cloning and expression in *E. coli* of, 291
Phosphatidylinositol-specific phospholipase C, growth of *S. aureus* in acidic media increases production of, 125
Photodynamic yeast cell damage, role in method for radioprotective effect evaluation, 31
Photoproduction, of nonhydrogenous resources by cyanobacteria, 83
Photosensitizers, effect on oral bacteria subjected to laser radiation, 77
Piromyces communis FL, degradation and fermentation of cellulose by, 143
Plasmid pC194, transformation of *Bacillus psychrophilus* with, 331
Plasmid pZAP1, *Z. mobilis* alkaline phosphatase activity in *E. coli* carrying, 41
Plasmids, in *Lactobacillus plantarum* strain caTC2, 219
Plastic films, starch-containing, in aquatic habitats, 1
Polyethylene, effect of aquatic habitats on plastic films containing, 1
Polyethylene-co-acrylic acid, effect of aquatic habitats on plastic films containing, 1
Polymorphisms, in internal transcribed spacers and rDNA of *Saccharomyces*, 251
Proton flux, in *Streptococcus bovis*, effect of ionophores on, 327
Proton symport, role in pyruvate transport in *Lactobacillus plantarum* 8014, 47
Protoxin proteins, of *Bacillus thuringiensis* subsp. *kurstaki*, binding of, 225
Pseudomonas cepacia, effects of 25-kDa lipase from on rat lungs, 89
Pseudomonas stutzeri, electroporation and maintenance of *E. coli* cloning vectors in, 25
Pseudomonas testosteroni growth, change of speciation of Cu(II) in growth medium due to ammonia uptake during, 57
pUC-based cloning vectors, electroporation and maintenance in *P. stutzeri*, 25
Pyruvate transport, by proton symport in *Lactobacillus plantarum* 8014, 47

Radioprotectors, method for evaluation of protective activity of, 31

Rhodopseudomonas palustris, anoxygenic degradation of aromatic substances by, 63
rplL gene, sequence analysis of aphid endosymbiont DNA fragment containing, 283
rpoB gene, sequence analysis of aphid endosymbiont DNA fragment containing, 283
rpoC gene, sequence analysis of aphid endosymbiont DNA fragment containing, 283
Ruminococcus flavefaciens 007
  degradation and fermentation of cellulose with rumen anaerobic fungi, 143
  effect of glycerol on growth, adhesion, and cellulolytic activity of, 197

Saccharomyces cerevisiae, molecular cloning and expression of *Bacillus subtilis bglS* gene in, 279
Saccharomyces strains, restriction polymorphisms in rDNA of, 251
Salmonella O30 group, antigenic relationship between *Escherichia coli* O157:H7 and, 215
Salmonella typhimurium mutants, role of nalidixic acid in isolation of, 257
Schizaphis graminum, sequence analysis of DNA fragment of, 283
SDS-PAGE analysis, of lipopolysaccharides from *V. vulnificus* biotypes 1 and 2, 99
Serratia marcescens, adherence of, to urinary tract epithelium and contact lenses, 113
Siderophore, from *Azospirillum lipoferum* M, isolation and characterization of, 347
Silver staining, electrophoresis of *Vibrio vulnificus* strains with, 99
Sodium chloride, effect on alginate production by fluorescent pseudomonads, 335
Soybean nodules, flavin/protein ratio in symbiosome space of, 269
Spiramycin, lysine catabolism in *Streptomyces ambofaciens* and production of, 313
Spore coat protein synthesis, by *Clostridium perfringens* type A, 35
Sporulation, of *Clostridium perfringens*, stimulated by nitropsin and distamycin, 183
Staphylococcus aureus
  mastitis, hydrophibicity, bacterial aging, and slime production in, 173
  production of phosphatidylinositol-specific phospholipase C by, 125
Starch-containing plastic films, degradation in aquatic environments, 1
Streptococcus bovis, effect of ionophores on proton flux in, 327
Streptococcus mitis ATCC 903, purification and characterization of aminopeptidase from, 261
Streptococcus sanguis, chemical sensitization of, to low-power laser radiation, 77
Streptomyces ambofaciens, lysine catabolism and spiramycin production in, 313
Streptomyces spp., cutinase production by, 165
Sucrose, cyanobacterial photoproduction of, 83
Sulfate-reducing bacterium, from anaerobic digester, TNT as nitrogen source for, 235
Synechococcus PCC 7942, photoproduction of nonhydrogenous resources by, 83

Thermoanaerobacter strain B6A, fermentation of xylans by, 189
Toxin proteins, of *Bacillus thuringiensis* subsp. *kurstaki*, binding of, 225
Trans-acting regulatory elements, *sodA* gene expression in *E. coli* affected by, 135
Trinitrotoluene, as nitrogen source for sulfate-reducing bacterium, 235
Two-dimensional gel electrophoresis, synthesis of cold shock and cold acclimation proteins studied by, 275

Urinary tract epithelium, hemagglutination and hydrophobicity in adherence of *Serratia marcescens* to, 113
Uronic acids, role in fermentation of xylans, 189

Vibrio vulnificus biotypes 1 and 2, electrophoretic analysis of lipopolysaccharides of strains from, 99

Whitefly endosymbionts, compared with those of aphids and mealybugs, 119

Xylanolytic activity of, *Thermoanaerobacter* strain B6A in xylan fermentation, 189
Xylans
  fermentation by *Butyrivibrio fibrisolvens* and *Thermoanaerobacter* strain B6A, 189
  formation of xylanolytic enzymes by *Butyrivibrio fibrisolvens* induced by, 297

Zymomonas mobilis
  alkaline phosphatase activity of, in *E. coli*, 41
  cloning and expression of *phoA* gene from, 291
